

Ports, Harbors and Airports

Disaster Prevention and Reduction Measures

Promotion of the Nankai Trough earthquake countermeasures, etc. Tsunami countermeasure at the Shimotsu Port coast (Kainan area) in Wakayama prefecture

In the tsunami inundation prediction area in Kainan City, Wakayama Prefecture, administrative and disaster prevention center functions and manufacturers of high value added products are gathered. For this reason, we are promoting maintenance of coastal conservation facilities for the protection of these facilities as well as human life and property against large-scale earthquakes such as the Nankai Trough earthquake.

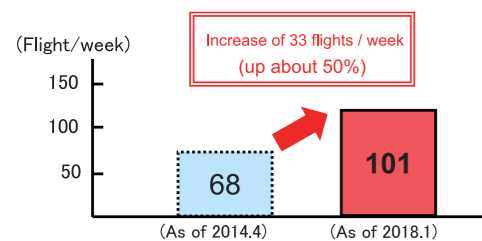

● Revetment height
Before upgrade: approximately 3 m from ground level
After upgrade: approximately 5 m from ground level

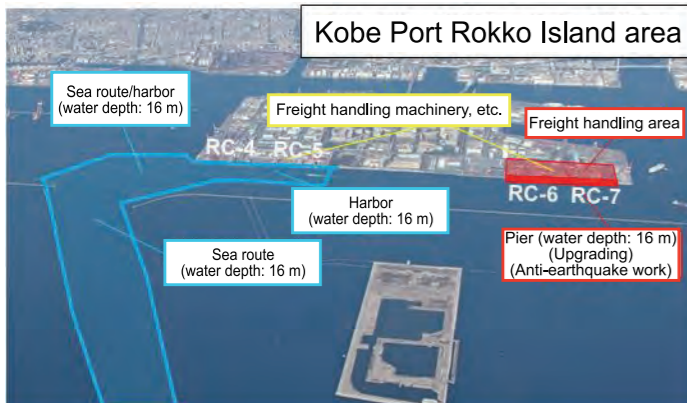

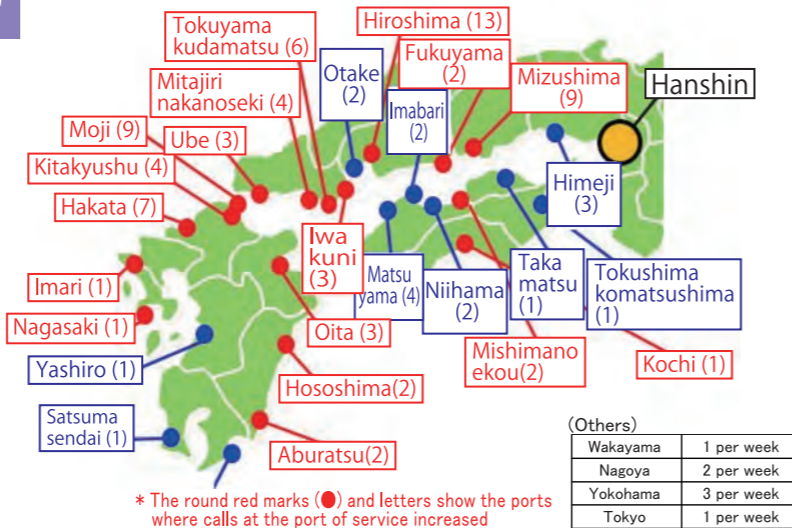

Revitalization of Economy / Region

Function enhancement of international container strategy port "Hanshin Port"

During changes in the situation surrounding shipping and port, including further enlargement of container ships and reorganization of major routes by cooperation among shipping companies, it is aimed that maintaining and expanding the major route to call at our country by deepening and accelerating port policies of international container strategy with non-structural and structural measures in order to strengthen the industrial competitiveness of Japan and to maintain and create national employment and income.

Expansion of the international feeder network by the international strategic harbor competitiveness reinforcement

To enable large vessels operating on major sea routes to enter Kobe Port and Osaka Port, construction of large container terminals with global standard water depth and area is being promoted.

Maintenance

Securing Public Safety and Security

Promotion of the Nankai Trough earthquake countermeasures, etc. Strengthening the disaster prevention function of government offices and facilities that will serve as a disaster prevention base

Upgrading of government offices and facilities that serve as disaster control bases is being promoted in cooperation with the respective regions

After disasters such as Nankai trough giant earthquakes, development of the Osaka sixth district combination government building (tentative name) with the necessary earthquake-resistant performance can go ahead by the PFI method, so that government agencies entering work on disaster prevention move into action precisely.
