

Table with 100 columns and 100 rows of numerical data. The table is organized into two main sections: '上段: 浸水(m)' (Upper section: Water depth in meters) and '下段: [地盤高(T.P.M)]' (Lower section: [Ground level (T.P.M)]). Each cell contains a numerical value representing data points for various parameters.

凡例
上段:
浸水(m)
2.11
[12.61]
下段:
[地盤高(T.P.M)]
