

Table with 100 columns and 100 rows of numerical data. The table is organized into two main sections: '上段: 浸水深(m)' (Upper section: Water depth in m) and '下段: [地盤高(T.P.m)]' (Lower section: [Ground level (T.P.m)]). Each cell contains a numerical value, often with a small number in brackets below it. The values range from approximately 0.00 to 1.00. The table is used for technical or scientific data analysis.

凡例  
上段:  
浸水深(m)  
2.11  
[2.61]

下段:  
[地盤高(T.P.m)]
