

Table with 100 columns and 100 rows of numerical data. The table is organized into two main sections: '上段: 浸水段(m)' (Upper section: Water-saturated section in meters) and '下段: [地盤高(T.P.m)]' (Lower section: [Ground level (T.P.m)]). Each cell contains a numerical value representing data points for various parameters across different locations or conditions.

凡例
上段:
浸水段(m)

下段:
[地盤高(T.P.m)]
