

Table with 25 columns and 100 rows of numerical data. The table is divided into two main sections: '上段: 漫水深(m)' (Upper section: Flow depth in m) and '下段: [地盤高(T.P.m)]' (Lower section: [Ground elevation (T.P.m)]). The data is organized into 25 vertical columns, each representing a specific cross-section or measurement point along a 100m horizontal distance. The values are presented in a grid format, with some cells containing multiple values or specific codes.

凡例
上段: 漫水深(m)
下段: [地盤高(T.P.m)]
